

## Chapter 5

### Time

(Students have to write in maths c.w. copy.)

Points to remember:

1. We see time in a clock or in a watch.

Clock

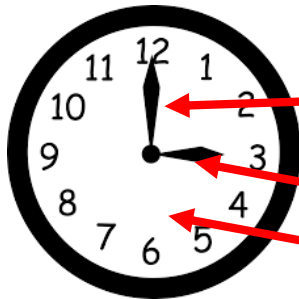

watch

2. The clock tell us the time. The face of the clock is called **Dial**.
3. The dial has numbers from **1 to 12** marked on it.
4. We calculate time in **Hour** or **minutes**.
5. This is a Clock it has two hands one is long and one is short.

The long hand shows the minutes, it is called the **minute hand**.

The short hand shows the hour, it is called the **hour hand**.

Minute hand

Hour hand

Dial

6. At every hour, the **minute hand** points to 12.
7. The **hour hand** points to a number from 1 to 12.
8. There are 24 hours in 1 day.
9. **60** minutes = 1 hour
