Chapter 4

Skip Counting and Multiplication

Points to remember:

1. Multiplication is **<u>repeated addition</u>**.

2. $\underline{\mathbf{x}}$ (cross) is the sign of multiplication.

3. When we multiply, two numbers the result we got is called **product** and the numbers are called multiplication factors.

4. Two numbers can be multiplied in any order their answer remains the <u>same</u>.

5. When we multiply zero (0) to any number, we always get <u>zero</u> in answer. Example 2 x 0 =0; 0 x 4 = 0

6. When any number is multiplied by 1 then the product or answer is always the **<u>number itself</u>**. Example 5 x 1 =5; 1 x 6 = 6
