

(Note: Continue after plane shapes. Write one shape on one page. Can stick images for examples.)

2. Solid shapes

1. Cuboid

- This is a Cuboid.
- A cuboid has 8 vertices, 6 surfaces, 12 edges.
- The opposite faces of a cuboid are rectangle-shaped and have the same shape and size.
- Examples are duster, pencil box and bricks.

2. Cube

- This is a cube.
- A cube has 8 vertices, 6 surfaces, 12 edges.
- All the faces of a cube are square-shaped and have the same shape and size.
- Examples are dice, sugar cube, and ice cube.

3. Cylinder

- This is a cylinder.
- It has 1 curved surface, 2 flat surfaces, and 2 curved edge.
- Examples are water-bottle, Gas-cylinder, Cold drink-cans.

4. Cone

- This is a cone.
- A cone has 1 flat surface,
- 1 curved surface, 1 curved edge, 1 vertex.
- Examples are birthday caps, joker's cap.

5. Sphere

- This is a sphere.
- A sphere has only one curved surface.
- Examples are football, globe, and planet.

Q1. Identify the shapes and write in the blanks.

1.

Sphere

2.

3.

4.
