Kinds of Plants

GET SET

These are the pictures of some parts of a plant.
Fill in the blanks to get their names.

LE A F F L O W E R F R U I T S E E D

We see many plants around us. Some plants are big. Some plants are small.

TREE

A tree is a big and tall plant. It has a hard and strong stem called the **trunk**. Mango, neem and banyan are some common trees. Most trees can live for hundreds of years.

CLIMBER

Some plants have weak stems. They cannot stand straight on their own. They need help to stand and grow straight. Such plants are called **climbers**. Pea plant, grapevine and money plant are some common climbers.

CREEPER

Some plants have very weak stems. They grow along the ground. Such plants are called **creepers**. Watermelon, muskmelon and pumpkin are some common creepers.
