DATE

26-07-21

#### Points to remember

1. Addition means putting together.

4

3

$$4 + 3 = 7$$

2. Addition means counting forward.

$$21 + 5 = 26$$

22, 23, 24, 25, 26

3. + (plus) is the symbol of addition.

4. The numbers that we are going to add are called addition facts.

5. The answer we got by adding the numbers is called sum.

For example  $4 + 3 = 7$ .

Here 4 and 3 are called addition facts and 7 is called sum.

6 When we add 0 (zero) to a number, we get the same number as the sum.

7 We can add two numbers in any order. Their sum will remain same

ex -  $4 + 3 = 7$

$$3 + 4 = 7$$
