### **Q.D Answer the following:**

*1. What do you mean by an ideal house?*

Ans: An ideal house is the one that has all the required amenities to make the life of its resident easy and comfortable.

*2. Why is sunlight important for an ideal house?*

Ans: Sunlight make the house naturally lit, bright, warm and free from pests. Sunlight disinfects the house by killing germs and bacteria and thereby protects the residents from diseases.

*3. In which direction should an ideal house face and why?*

Ans: An ideal house should always be south facing to allow a lot of fresh cool breeze to come in and during winters can let in sunlight and keep the house warm.

*4. What normally leads to a house theft?*

Ans: House thefts happen due to the weak resistance and faulty locks of the main and back doors.

*5. What does a closed circuit camera do?*

Ans: Closed circuit cameras are smart way to be aware of what is going in and around the house even when the residents are away.

*6. What should be the location of an ideal house?*

Ans: The location of an ideal house should be near to the main road where all the facilities can be easily accessible.

*7. What is a fire Extinguisher?*

Ans: A fire Extinguisher is a device used to put off fire.
