1. Which among the following is generally not predicted in a daily weather report?

Temperature

Pressure

Humidity

Humidity

2. Weather changes

week after week

day after day

within a short period

in any of the above time period

3. Rainfall is measured by

rain gauge

water level increase in ponds

water level increase in water table

none of these

4. Given below are some adaptive features of animals:

(i) Layer of fat under the skin

(ii) Long, curved and sharp claws

(iii) Slippery body

(iv) Thick white fur

Which of them are the adaptive features of a polar bear?

(i) only

(i) and (ii) only

(i), (ii) and (iii) only

(i), (ii) and (iv) only

5. Which of the following statement is incorrect for penguins?

They huddle together

They cannot swim

They have webbed feet

They have streamlined body

6. Read the following environmental conditions of tropical rain forests:

(i) Hot and humid climate

(ii) Unequal lengths of day and night

(iii) Abundant rain fall

(iv) Abundant light and moisture

Identify the conditions from the above list that are responsible for the presence of large number of plants and animals in tropical rain forests.

(i) and (ii)

(i) and (iii)

(i), (iii) and (iv)

(ii) and (iv)

7. The coldest region on earth is the:

polar region

tropical region

temperate region

coastal region

8. Choose the odd one from the following options:

Thick layer of fat under the skin

White fur

Long grasping tail

Wide and large feet with sharp claws

9. Which of the following is not an adaptive feature in polar bear?

White fur

Strong sense of smell

Long curved and sharp claws

Long tail

10. Which is the characteristic feature of tropical rainforests?

Hot and humid climate

Enormous number and variety of animals

Competition for food and shelter

All of these

1. Which among the following is generally not predicted in a daily weather report?

- Temperature
- Pressure ✓
- Humidity
- Humidity

Question was not answered

2. Weather changes

- week after week
- day after day
- within a short period
- in any of the above time period ✓

Question was not answered

3. Rainfall is measured by

- rain gauge ✓
- water level increase in ponds
- water level increase in water table
- none of these

4. Given below are some adaptive features of animals:

(i) Layer of fat under the skin

(ii) Long, curved and sharp claws

(iii) Slippery body

(iv) Thick white fur

Which of them are the adaptive features of a polar bear?

- (i) only
- (i) and (ii) only
- (i), (ii) and (iii) only
- (i), (ii) and (iv) only ✓

Question was not answered

5. Which of the following statement is incorrect for penguins?

- They huddle together
- They cannot swim ✓
- They have webbed feet
- They have streamlined body

6. Read the following environmental conditions of tropical rain forests:

(i) Hot and humid climate

(ii) Unequal lengths of day and night

(iii) Abundant rain fall

(iv) Abundant light and moisture

Identify the conditions from the above list that are responsible for the presence of large number of plants and animals in tropical rain forests.

- (i) and (ii)
- (i) and (iii)
- (i), (iii) and (iv) ✔
- (ii) and (iv)

Question was not answered

7. The coldest region on earth is the:

- polar region ✔
- tropical region
- temperate region
- coastal region

- White fur
- Long grasping tail ✓
- Wide and large feet with sharp claws

Question was not answered

9. Which of the following is not an adaptive feature in polar bear?

- White fur
- Strong sense of smell
- Long curved and sharp claws
- Long tail ✓

Question was not answered

10. Which is the characteristic feature of tropical rainforests?

- Hot and humid climate
- Enormous number and variety of animals
- Competition for food and shelter
- All of these ✓
