# CHAPTER - 1

MULTIPLICATION

What is skip counting?
In math, skip counting can be defined as the method of counting forward by numbers other than 1.
To skip count, we keep adding the same number each time to the previous number.

Here, we are skip counting by 2 on a number line. So, starting at 0, the next number will be 0 + 2 = 2, then, 2 + 2 = 4, then 4 + 2 = 6, then 6 + 2 = 8, and then, 10, 12, 14, 16, 18 and so on.

SO , when skip count in 2s we get 0 , 2 , 4 , 6 , 8 , 10 , 12 and so on .

EXAMPLE - Skip counting by 5s –

Start from 0 , leave 1, 2,3 ,4 take 5 , leave 6, 7, 8 and 9 take 10 and so on

EXAMPLE – Skip counting by 10 -

· Using every 10th number.

▶ **10, 20, 30, 40, 50, 60, 70, 80, 90, 100**

Start from 0 and leave 1 to 9 and take 10 and so on.
